

## LUCA BJORNSTEN

Luca Bjørnsten is a Danish artist based in Copenhagen. Luca's work is a slightly ironic or humorous take on contemporary life, and our modern landscape. Taking a holistic approach to his practice, there is often a symbiosis between the way the artwork is made and the subject matter of the work. A feeling of joy and something peaceful, yet something unnerving seems to be at work at the same time. These forms of expression all represent different characteristics of modern life, such as mass production, consumerism, climate change and plastic waste.

### CV
